

Product Data Sheet

SoSafe™ Safety Shield – Anti Graffiti Coating

Ideal to protect surfaces against permanent graffiti stains and to increase the ease of graffiti removal from difficult or sensitive surfaces such as: Sandstone, murals, war memorials, signs, painted surfaces and more. . .

Product Description

SoSafe™ Safety Shield is a semi sacrificial surface graffiti protection, making it easy to remove graffiti and suitable for all surface types (excluding glass).

Safety Shield is UV resistant and stabilized therefore will not breakdown or yellow when exposed to sunlight unlike permanent anti-graffiti coatings. SoSafe™ Safety Shield allows the surface to breathe protecting treated surfaces against mould, reducing environmental effects and the aging process.

SoSafe™ Safety Shield will not leave a glossy finish and can be painted over with no detrimental effects (i.e. the paint will not peel).

How it works

Safety Shield works by blocking the pores of the surface, the pores of a graffiti surface is what causes the 'shadow' effect. This protection allows the graffiti to be removed with no harm to the protected substrate below.

The vast majority of porous substrates should be treated with two coats of Safety Shield, some substrates may absorb more anti graffiti coating and therefore require a third coat (ie. sand stone).

Protection Level:

Semi-Sacrificial - protects surface against graffiti remover for several attacks.

Characteristics

- * pH Neutral
- * Non-Flammable
- * Non-Hazardous
- * Biodegradable
- * Non-Toxic
- * Non-Corrosive
- * Non-Water Neutralised

Tools / Equipment

- * Gloves
- * Chemical Goggles
- * Applicator (Sprayer / Paint Brush / Roller)

Safety

When using Safety Shield follow safety directions on the label, wear appropriate attire including - enclosed shoes, gloves and goggles.

Application Procedure

1. Moisten surface with water.
2. Shake Safety Shield vigorously.
3. Apply two coats to surface with brush, roller or sprayer (one hour between coats)
4. OPTIONAL - Rinse wall two days later.

NOTE: Safety Shield will release Surface Active Agents used to penetrate surface protecting the wall for years to come.

Product Coverage

8 – 10 Metres per litre (2 coats) and provides approximately 5 – 7 years anti graffiti protection depending on environmental factors.

Pack Sizes

12x750mL (Retail Only) / 10x1Lt / 3x5Lt / 25Lt
